# Shopify Tagging Manual

Tag the product correctly and it puts itself on the right pages. This is the complete list of tags, and what each one does.

Version 2.0 · 21 September 2026
Prepared by Rooftop Twenty Two
Written from the live website code, not from convention

Your job is tags. Collections and imports are ours — section 2 explains why, and it matters more than anything else in this manual.

# What is in this manual

| | | |
|---|---|---|
| 1 | **How a product reaches a page** | Tag → collection → page, and why you only touch the first one |
| 2 | **What you do, and what you must not do** | Read this one twice |
| 3 | **The six rules** | Read once, follow always |
| 4 | **Adding a product** | Field by field, in the admin |
| 5 | **The complete tag list** | Every tag, what it does, when to use it |
| 6 | **Which tag sends it where** | The map from tag to page |
| 7 | **Build a Gift** | The eleven shelves and their tags |
| 8 | **Worked examples** | Six real products, fully tagged |
| 9 | **It is not showing up** | Fault-finding in order |
| 10 | **Quick reference card** | One page to print and keep |

**WHO THIS IS FOR**

Anyone at The Parcel Concierge who adds or edits products in Shopify. You do not need to understand the website to use it. Fill in the product, apply the tags from section 5, save. Everything after that happens by itself.

# 1 How a product reaches a page

Three steps. You only ever touch the first one.

| The chain, start to finish |
|---|
| **1. You tag the product.** → You add **All Hampers** to a new hamper. This is your job, and the only part that is. |
| **2. The collection collects it.** → The hamper collection is set to gather anything tagged "All Hampers" automatically. Nobody adds it by hand. |
| **3. The page shows it.** → The website asks that collection what is in it, and builds /hampers from the answer. |

So a tag is not a label on a shelf. **A tag is what puts the product on the shelf.** Get the tags right and the pages look after themselves.

## 1.1 The three jobs tags do

| KIND OF TAG | EXAMPLE | WHAT IT CONTROLS |
|---|---|---|
| **Collection tags**<br>*plain words, capitalised* | **All Hampers**<br>**Red Wines** | **Which page it appears on.** These are the ones that matter most. |
| **Kind tags**<br>*start with* `type:` | `type:hamper` | Its web address, which template it uses, and whether the over-18 gate appears. |
| **Filter tags**<br>`occasion:`, `recipient:`, *wine words* | `occasion:christmas`<br>**Bordeaux** | The filters down the side of a listing. |

# 2 What you do, and what you must not do

### ✓ Please do

- Add products in the Shopify admin, one at a time
- Edit a product's title, description, images, price and stock
- **Apply the tags in section 5**
- Fix a tag that is wrong or missing
- Unpublish a product you no longer sell
- Tell us when something does not appear where you expected

### ✗ Please do not

- **Do not create, edit or delete collections**
- **Do not import products by CSV**
- Do not add a product to a collection by hand
- Do not change a product's handle
- Do not remove existing tags to tidy up
- Do not use `type:builder-item` on anything

## 2.1 Why not collections

**DO NOT ADD COLLECTIONS**

The website reads a fixed set of collections **by their handle** — the short name in the web address, not the title on screen. Handles are unforgiving:

- Shopify quietly adds `-1` or `-2` when a handle is taken. A collection at the wrong handle is **invisible to the website**, and looks completely normal in the admin.
- Renaming a collection does **not** change its handle. This is why the hamper collection is titled "General Hampers 2026" but its handle is still `christmas-2026`.
- A manual collection **cannot** be converted to an automated one afterwards. It has to be deleted and rebuilt — and by then the handle is taken.
- Deleting a collection darks its page on the site immediately.

A new collection is a change to the website, not a change to Shopify. **Tell us what you want and we will set it up with its page in the same release.**

## 2.2 Why not CSV imports

**DO NOT IMPORT PRODUCTS**

A product CSV import is the fastest way to damage the catalogue, and the damage is quiet:

- **A CSV has no collections column.** So an import can never put a product on a page, no matter how it is filled in. People assume it has worked and it has not.
- If the **"Overwrite any current products that have the same handle"** box is left unticked, Shopify **silently skips** every product that already exists. It reports success. Almost nothing changes. This has already cost us once — a wine collection came back with 314 products instead of 373.
- If it *is* ticked and a column is blank, the blank **overwrites** the real value. One missing column can wipe descriptions, images or prices across thousands of products.
- An import cannot be undone.

**If you need to change many products at once, send us the list.** We do it against a backup, in a way that can be reversed.

**WHAT THIS LEAVES YOU**

Everything that matters day to day: adding products, writing them properly, pricing them, photographing them and tagging them. The tags are the steering wheel — sections 5 and 6 are the whole job.

# 3 The six rules

1. **Every product needs at least one collection tag.** Without one it reaches no page. It will still turn up in site search, which is why this is easy to miss.
2. **Never remove existing tags.** Tags like "French Wines" and "Chenin Blanc Wine" are not clutter — they are what fills the Country and Grape filters today. Add to them; never tidy them away.
3. **Spelling and capitals must match exactly.** The collection tags in section 5.1 are matched literally. `All Hampers` works; "all hampers" and "All Hamper" do not.
4. **A page needs four products to open.** Under four, it redirects to its parent. Deliberate — an empty page is worse than no page.
5. **Out of stock means off the site.** Listings and search hide anything unavailable. You do not need to unpublish it.
6. **Changes take up to an hour to appear.** The site caches pages for speed. Nothing is broken — wait, or ask us to clear it.

# 4 Adding a product

In the Shopify admin, one at a time. **Products → Add product.**

| FIELD | REQUIRED? | WHAT THE WEBSITE DOES WITH IT |
|---|---|---|
| **Title** | Yes | Shown on the card and the product page. Also what site search matches on. |
| **Handle** | Automatic | The web address. **Never change it on a live product** — it breaks every existing link and any Google ranking. |
| **Description** | Yes | The product page body. Worth writing properly; it is what ranks. |
| **Images** | Yes | The first image is the card image. Landscape 4:3 works best. |
| **Price** | Yes | Price bands are worked out from this automatically. **There is no price tag to set.** |
| **Inventory** | Yes | Zero stock hides it everywhere. |
| **Published** | Yes | Unpublished is invisible, full stop. |
| **Product type** | No | Leave blank. Do not type anything here. |
| **Tags** | **Yes** | **Section 5. This is the part that decides where it shows.** |
| **Collections** | No | **Leave this panel alone.** It fills itself from your tags. |

## 4.1 The order to work in

1. Title, description, images.
2. Price and inventory.
3. **Tags.** Go to section 6, find the row for what you are adding, and apply every tag in it.
4. Save.
5. Check the website within the hour. If it is not there, section 9.

# 5 The complete tag list

Every tag the website reads. Nothing else has any effect.

## 5.1 Collection tags — these decide the page

Plain words, capitalised exactly as shown. **Every product needs at least one.**

| TAG | USE IT FOR | WHERE THE PRODUCT THEN APPEARS |
|---|---|---|
| **All Hampers** | Every finished hamper | **/hampers, its four price bands, /occasions/christmas, the homepage band** |
| **Fine Wines** | **Every** wine, Champagne, port, sherry and spirit | **/wine, /wine/fine-wines, the three wine price bands, Build a Gift wine shelf** |
| **Red Wines** | Red wine | **/wine/red** |
| **White Wines** | White wine | **/wine/white** |
| **Rose Wine** | Rosé | **/wine/rose** |
| **Champagne and Prosecco** | Anything sparkling | **/wine/champagne-sparkling, Build a Gift sparkling shelf** |
| **Port and Sherry** | Port, sherry, dessert wine | **/wine/port-dessert** |
| **Organic Wine** | Organic and biodynamic | **/wine/organic-biodynamic** |
| **Non-Alcoholic** | Alcohol-free wine and fizz | **/wine/alcohol-free** |
| **Wine Gift Sets** | Boxed wine sets | **/wine/gift-sets** |
| **All Gifts** | **Everything that is not a hamper or a wine** | **Build a Gift, "Everything" shelf** |
| **All Food** | Food and larder | **Build a Gift, "Food and larder"** |
| **Chocolate & Confectionery** | Chocolate and sweets | **Build a Gift, "Chocolate and sweet things"** |
| **Candles & Diffusers** | Candles, diffusers, home fragrance | **Build a Gift, "Candles and fragrance"** |
| **Beauty** | Beauty and bath | **Build a Gift, "Beauty and bath"** |
| **Homeware** | Homeware, kitchen, crystal, glassware | **Build a Gift, "Homeware and kitchen"** |
| **Baby** | Baby and children | **Build a Gift, "Baby and children"** |
| **Jewellery** | Jewellery, scarves, accessories | **Build a Gift, "Jewellery and accessories"** |
| **Greeting Cards** | Cards and stationery | **Build a Gift, "Cards and stationery"** |

**TWO OF THESE, NOT ONE**

**Wine:** always **Fine Wines** *plus* its colour or style tag. In "Red Wines" alone it is missing from /wine and from every price band.

**Gifts:** always **All Gifts** *plus* its shelf tag. "All Gifts" is the "Everything" shelf, which is the one most customers open first.

**Hampers:** **All Hampers** on its own is enough. The price band is chosen from the price automatically.

**CRYSTAL AND GLASSWARE**

There used to be a **Glassware & Crystal** tag with a page of its own. That page was retired in September 2026, so the tag now leads nowhere. Tag crystal and glassware **All Gifts** + **Homeware**. Leaving the old tag on as well does no harm.

## 5.2 Kind tags — exactly one per product

| TAG | USE IT FOR | WHAT IT DOES |
|---|---|---|
| `type:hamper` | Finished hampers | Address becomes /hampers/<name>, hamper template |
| `type:wine` | Wine, Champagne, port, sherry | Address becomes /wine/<name>, wine template, **arms the over-18 gate** |
| `type:spirit` | Spirits and liqueurs | As above, with the age gate |
| `type:addon` | Everything else | Marks it as something that goes into a hamper |

**NEVER USE TYPE:BUILDER-ITEM**

It exists for internal test data. On the live shop it **removes the product from the Build a Gift picker, from every listing, from search and from the sitemap** — leaving it with no way to be bought at all. If you ever see it on a real product, take it off.

## 5.3 Occasion tags — as many as apply

These fill the "Occasion" filter. All eight, and there are no others:

| TAG | SHOWS AS | USE IT FOR |
|---|---|---|
| `occasion:christmas` | Christmas | Christmas gifting |
| `occasion:new-baby` | New baby | New arrivals, baby showers |
| `occasion:sympathy` | Sympathy | Bereavement and condolence |
| `occasion:anniversary` | Anniversary | Anniversaries |
| `occasion:thank-you` | Thank you | Thank-you gifts |
| `occasion:birthday` | Birthday | Birthdays |

| TAG | SHOWS AS | USE IT FOR |
|---|---|---|
| `occasion:wedding` | Wedding | Weddings and engagements |
| `occasion:corporate` | Corporate | Business and client gifting |

## 5.4 Recipient tags — as many as apply

| TAG | SHOWS AS | USE IT FOR |
|---|---|---|
| `recipient:her` | For her | |
| `recipient:him` | For him | |
| `recipient:couple` | For couples | Weddings, housewarmings |
| `recipient:family` | For families | Sharing hampers |
| `recipient:client` | For clients | Corporate gifting |

## 5.5 The alcohol tag

| TAG | WHAT IT DOES |
|---|---|
| `contains:alcohol` | Arms the over-18 gate when the item goes into a Build a Gift box, and marks a corporate gift as alcoholic. **Put it on beer, cider, liqueurs, liqueur chocolates, Christmas puddings with brandy, and any hamper containing alcohol.** This is the tag missed most often, and the one with legal weight. |

## 5.6 Wine description tags

Plain words, no prefix. These fill the Country, Region and Grape filters. The website is forgiving here — case, accents and a trailing "Wine" all work, so "french wine", "French Wines" and "France" all count as France.

| FILTER | TAG IT LIKE THIS | NOTES |
|---|---|---|
| **Country** | **France** **Italy** **Spain** **South Africa** | One per wine |
| **Region** | **Bordeaux** **Rioja** **Chianti** **Stellenbosch** | The region on its own — no "Region" and no country attached |
| **Grape** | **Cabernet Sauvignon** **Chenin Blanc** **Syrah** | One per grape; a blend can have several |

## 5.7 Tags to leave alone

| TAG | STATUS | WHY |
|---|---|---|
| `badge:irish-made` `badge:guaranteed-irish` `badge:hand-delivered` `badge:exclusive` | **Ask us first** | These drive flags on the product card. `badge:exclusive` also needs a setting the store does not have yet, so it does nothing on its own. Tell us which products deserve a badge and we will set them. |

| TAG | STATUS | WHY |
|---|---|---|
| `price:under-50`<br>`price:50-100`<br>`price:100-150`<br>`price:150-plus` | **Do not use** | The website works price bands out from the actual price. These do nothing and go stale the moment a price changes. |
| `aisle:` anything | **Do not use** | Nothing reads them. |
| `type:builder-item` | **Never** | See 5.2. It makes a product unbuyable. |

# 6 Which tag sends it where

Find your row. Apply every tag in it. That is the whole job.

**A finished hamper or gift box sold as one product**

**Tags:** `All Hampers` `type:hamper` `contains:alcohol` *(if it holds any)* plus `occasion:` and `recipient:` as they apply
**Appears on:** /hampers · its price band *(automatic, from the price)* · /occasions/christmas · the homepage hamper band · search

**Wine, Champagne, port or sherry**

**Tags:** `Fine Wines` **+** its style tag (`Red Wines` / `White Wines` / `Rose Wine` / `Champagne and Prosecco` / `Port and Sherry` / `Organic Wine` / `Non-Alcoholic` / `Wine Gift Sets`)
`type:wine` `contains:alcohol` plus country, region and grape
**Appears on:** /wine · its style page · its price band *(automatic)* · Build a Gift wine shelf

**A spirit or liqueur**

**Tags:** `Fine Wines` `type:spirit` `contains:alcohol`

**Anything else — chocolate, candles, crystal, baby, cards, homeware, food**

**Tags:** `All Gifts` **+** one shelf tag from section 7 `type:addon` `contains:alcohol` *(if it holds any)*
**Appears in:** Build a Gift, on "Everything" and on your shelf · search

> **WHY THERE IS NO GIFTS SECTION**
>
> The site sells **hampers and wine** as its products. Everything else is sold as something you put into a hamper, through Build a Gift. A chocolate bar is not missing because it has no gifts page — it is on the chocolate shelf of the builder, which is where it belongs.

# 7 Build a Gift — the eleven shelves

When a customer builds their own hamper they browse shelves. The tag in the middle column is what puts a product on a shelf.

| SHELF THE CUSTOMER SEES | TAG | AGE GATE? |
|---|---|---|
| Everything | **All Gifts** | No |
| Food and larder | **All Food** | No |
| Chocolate and sweet things | **Chocolate & Confectionery** | No |
| Wine and Champagne | **Fine Wines** | Yes |
| Champagne and sparkling | **Champagne and Prosecco** | Yes |
| Candles and fragrance | **Candles & Diffusers** | No |
| Beauty and bath | **Beauty** | No |
| Homeware and kitchen | **Homeware** | No |
| Baby and children | **Baby** | No |
| Jewellery and accessories | **Jewellery** | No |
| Cards and stationery | **Greeting Cards** | No |

**ALWAYS TWO TAGS**

**All Gifts** is the "Everything" shelf. In "All Gifts" only, a product is findable but buried. In a specific shelf only, it is missing from "Everything" — the shelf most customers open first. Use both.

# 8 Worked examples

### A New hamper — "The Winter Table", €145, contains wine

| | |
|---|---|
| Tags | **All Hampers** `type:hamper` `contains:alcohol` `occasion:christmas` `recipient:family` |
| Appears on | /hampers · /hampers/125-200 *(from the price)* · /occasions/christmas · homepage band |
| Watch for | It holds wine, so `contains:alcohol` is not optional. |

### B Red wine — Château Les Moutins Bordeaux 2021, €22

| | |
|---|---|
| Tags | **Fine Wines** **Red Wines** `type:wine` `contains:alcohol` **France** **Bordeaux** **Cabernet Sauvignon** |
| Appears on | /wine/fine-wines · /wine/red · /wine/under-25 *(automatic)* · Build a Gift wine shelf |
| Watch for | Two collection tags, not one. "Red Wines" alone misses /wine and every price band. |

### C Box of chocolates — Butlers Festive Collection, €12

| | |
|---|---|
| Tags | **All Gifts** **Chocolate & Confectionery** `type:addon` `occasion:christmas` |
| Appears in | Build a Gift — "Everything" and "Chocolate and sweet things" · search |
| Watch for | No page of its own, and that is correct. If they were *liqueur* chocolates, add `contains:alcohol`. |

### D Galway Crystal Champagne flutes, €60

| | |
|---|---|
| Tags | **All Gifts** **Homeware** `type:addon` `occasion:wedding` `recipient:couple` |
| Appears in | Build a Gift — "Everything" and "Homeware and kitchen" |
| Watch for | Crystal goes under Homeware now. The old crystal page is gone — see 5.1. |

### E Alcohol-free sparkling — Noughty Rosé, €14

| | |
|---|---|
| Tags | **Fine Wines** **Non-Alcoholic** `type:wine` **Spain** — **no** `contains:alcohol` |
| Appears on | /wine/fine-wines · /wine/alcohol-free · /wine/under-25 |
| Watch for | The over-18 gate still arms from `type:wine`. Intentional and consistent. |

### F  Baby blanket — McNutt of Donegal lambswool, €45

| | |
|---|---|
| Tags | **All Gifts** **Baby** `type:addon` `occasion:new-baby` `recipient:family` |
| Appears in | Build a Gift — "Everything" and "Baby and children" · search |
| Watch for | It will not appear on a new-baby page — that page is switched off at present. The tag is still worth adding for when it returns. |

# 9 It is not showing up

Work down in order. This is sorted by how often each one turns out to be the cause.

| # | CHECK | FIX |
|---|---|---|
| 1 | **Does it have a collection tag from 5.1?** | Nine times out of ten this is it. Add the right one from section 6. |
| 2 | **Is the tag spelt exactly right?** | Capitals and spacing are matched literally. "all hampers" does nothing. |
| 3 | **Has an hour passed?** | Pages cache for up to an hour. Wait, or ask us to clear it. |
| 4 | **Is it in stock?** | Zero stock hides it from every listing and from search. |
| 5 | **Is it published?** | Check the online sales channel is switched on. |
| 6 | **Wine: does it have both tags?** | **Fine Wines** *and* its style tag. One alone is not enough. |
| 7 | **Does that page have four products?** | Under four and it redirects to its parent. |
| 8 | **Still nothing?** | **Send us the product handle and what you expected.** Do not start creating collections or changing handles. |

## 9.1 A filter is empty but the products are there

Filters come from tags. An empty Country filter means those wines have no country tags. Add them — and remember rule 2: never remove the ones already there.

## 9.2 Something needs a new page or a new collection

Tell us. A new page is a website change, and it goes out with its collection in the same release so nobody lands on an empty page.

# 10 Quick reference card

Print this page and keep it beside the screen.

### Hamper

| | |
|---|---|
| **Always** | **All Hampers** `type:hamper` |
| **If it holds alcohol** | `contains:alcohol` |
| **As they apply** | `occasion:…` `recipient:…` |

### Wine, Champagne, port, sherry

| | |
|---|---|
| **Always** | **Fine Wines** `type:wine` `contains:alcohol` |
| **Plus one style** | **Red Wines** **White Wines** **Rose Wine** **Champagne and Prosecco** **Port and Sherry** **Organic Wine** **Non-Alcoholic** **Wine Gift Sets** |
| **Plus description** | country · region · grape, as plain words |

### Everything else

| | |
|---|---|
| **Always** | **All Gifts** `type:addon` |
| **Plus one shelf** | **All Food** **Chocolate & Confectionery** **Candles & Diffusers** **Beauty** **Homeware** **Baby** **Jewellery** **Greeting Cards** |
| **If it holds alcohol** | `contains:alcohol` |

### Occasion and recipient

| | |
|---|---|
| **occasion:** | christmas · new-baby · sympathy · anniversary · thank-you · birthday · wedding · corporate |
| **recipient:** | her · him · couple · family · client |

**NEVER**

**Never** create, edit or delete a collection · **never** import products by CSV · **never** change a handle · **never** remove existing tags · **never** use `type:builder-item`

**IN SHORT**

**Tag it properly and it puts itself on the right pages.** If it does not, that is ours to fix — send us the handle.

Rooftop Twenty Two · cathal@rooftoptwentytwo.ie
