Typography

Employing the condensed all-caps font, Bebas Kai, is particularly effective for crafting impactful large headlines, providing a bold contrast to the serif font, Salfish; used for secondary headings and short paragraphs.

The script font, South Epic, introduces a human touch with its handwritten appearance, fostering a conversational and personable brand identity when cleverly integrated into various communication materials.

Futura, a timeless sans-serif font, serves as the brand's standard choice for body text in both web and print content.
